Fish Feel is participating with In Defense of Animals (IDA)'s Interfaith Vegan Coalition to encourage religious institutions to stop holding lobster boil fundraisers. In particular, St. Thomas Episcopal Church, in Alabama, boils thousands of lobsters to death during its annual Lobsterfest.

The Coalition has contacted officials at St. Thomas, and IDA has posted a petition urging the church to instead opt for humane alternatives. **Please sign the [petition](#)!** The page includes information explaining how egregiously cruel it is to plunge live lobsters into boiling water (e.g., they cannot go into shock, so they suffer every agonizing second they are cooked).

Please also share the petition and encourage others to sign it, too.

Religious institutions should promote compassion not cruelty!
